Summary

1	Introduction
2	Part 1 – Download application
2.1	Architecture of the download application
2.2	Report of a successful download
3	Part 2 – Network configuration and analysis
3.1	Experiment 1
3.1.1	Network architecture
3.1.2	Experiment objectives
3.1.3	Main configuration commands
3.1.4	Analysis of the logs
3.2	Experiment 2
3.2.1	Network architecture
3.2.2	Experiment objectives
3.2.3	Main configuration commands
3.2.4	Analysis of the logs
3.3	Experiment 3
3.3.1	Network architecture
3.3.2	Experiment objectives
3.3.3	Main configuration commands
3.3.4	Analysis of the logs
3.4	Experiment 4
3.4.1	Network architecture
3.4.2	Experiment objectives
3.4.3	Main configuration commands
3.4.4	Analysis of the logs
4	Conclusions
5	References

6 Annexes

6.1 Code of the download application

6.2 Configuration commands

6.3 Logs captured
